PROFESSIONAL SUMMARY

Computer Engineering undergraduate (B.Tech, expected 2028) seeking a Software Engineering, Full-Stack Development, or Cloud Engineering internship. Hands-on project experience building full-stack applications with React, TypeScript, Node.js, and Express, and deploying with Docker, GitHub Actions, and AWS (Amazon S3).

TECHNICAL SKILLS

Programming Languages: C, C++, Java, JavaScript, TypeScript
Frontend Development: HTML5, CSS3, React.js, Tailwind CSS, Vite, React Router DOM
Backend Development: Node.js, Express.js, REST API Development, NestJS (project exposure)
Databases: MySQL, MongoDB, Mongoose, PostgreSQL (project exposure)
Cloud Computing (AWS): Amazon S3, Amazon EC2, Amazon CloudFront, Amazon Route 53, AWS IAM
DevOps & Version Control: Git, GitHub, GitHub Actions, CI/CD, Docker, Docker Compose
Tools: Visual Studio Code, IntelliJ IDEA, Postman, Antigravity

TECHNICAL PROJECTS

DeployFixLab – Deployment Diagnosis & Recovery Platform *Completed*
Tech Stack: *React 18, Vite, Node.js, Express.js, PostgreSQL (Supabase), Prisma ORM, Docker, GitHub Actions*

- Developed a full-stack platform connecting the frontend, backend, database, and deployment infrastructure to help developers troubleshoot application failures and plan recovery.
- Implemented deployment diagnostic workflows for investigating application and configuration issues, along with backend health-check and deployment reliability workflows.
- Designed a unified project context for repository information and deployment-related technical data; built GitHub repository connection architecture for repository selection and project integration.
- Containerized the application with Docker and configured deployment settings.

Saturn – Intraday Market Intelligence Platform *In Development*
Tech Stack: *React.js, TypeScript, Node.js*

- Building a full-stack decision-support platform for Indian NSE/BSE markets (analysis and decision support only; not an automated trading bot).
- Designed a TypeScript monorepo architecture with separate application and shared packages for modularity and maintainability.
- Developed authentication, dashboard, watchlist, and scanner-import features; built market-data ingestion and technical-analysis modules using VWAP, EMA, RSI, relative volume, and support/resistance.
- In progress: explainable trade-plan generation, risk management, and historical candle replay.

Zero-Cost AWS Portfolio Website *Cloud Computing | Frontend*
Tech Stack: *React.js, TypeScript, Vite, Amazon S3*

- Developed a responsive portfolio website with React.js and TypeScript, using Vite for development and build configuration; added downloadable resume PDF functionality.
- Deployed the static website on Amazon S3 static website hosting with a focus on cost-efficient cloud deployment.

FileFlow – Secure File Sharing Platform *AWS Integrations Planned*
Tech Stack: *React.js, TypeScript, Vite, Tailwind CSS, Node.js, NestJS*

- Designed a modular React and TypeScript frontend architecture for a file storage and sharing application; planned file-management workflows and backend/AWS integrations (not yet implemented).

Website Development Projects *Frontend-Backend*

- **Lexis Electronics:** Built a business website for a flood-light manufacturer, focusing on product presentation and user interface.
- **Le Meridien:** Built a hotel-related website with structured content presentation and a user-friendly frontend interface.

EDUCATION

Marwadi University, Rajkot, Gujara **t***Expected Graduation: 2028*
Bachelor of Technology (B.Tech) in Computer Engineering | CGPA: 7.35/10
